Simplifying Access for First Responders: How TecTANGO Streamlines Workflows and Enhances Security

Introduction

First responders play a critical role in keeping our communities safe and responding to emergencies quickly and effectively. However, they face numerous challenges in their day-to-day work, including accessing critical information in a timely and secure manner. TecTANGO offers a solution to simplify the login process, enhance security, and streamline workflow for first responders, improving their ability to respond to emergencies and save lives.

Challenges Faced by First Responders:

First responders, such as police officers, firefighters, and EMS personnel, face unique challenges when it comes to accessing critical information. They often need to access multiple systems, such as dispatch software, medical records, and incident reports, while on the go and under time pressure. This can be complicated by the need to remember multiple passwords and the risk of password sharing or unauthorized access.

How TecTANGO Helps First Responders:

TecTANGO offers a simple and secure solution for first responders to access the information they need quickly and easily. With TecTANGO, first responders can use a tap-and-go solution to seamlessly log in to multiple systems without the need to remember multiple passwords. This not only saves time but also enhances security by reducing the risk of password sharing or unauthorized access.

TecTANGO also integrates with Okta's Identity and Access Management Platform, providing a centralized and secure solution for managing access across different systems and devices. This helps first responders meet strict regulatory requirements for data privacy and security while also allowing for scalability and flexibility in managing access across different departments and teams.

Benefits of TecTANGO for First Responders

- Simplified login process
- Enhanced security
- Quick access to critical information
- No need for multiple logins or passwords
- Streamlined workflows
- Increased productivity
- Reduced burden of administrative tasks
- Focus on core mission of responding to emergencies and saving lives
- Support for mental well-being of first responders

Conclusion

TecTANGO offers a valuable solution for first responders, simplifying the login process, enhancing security, and streamlining workflows. By enabling quick and secure access to critical information, TecTANGO helps first responders respond to emergencies more effectively and save lives.

Our Products

▸ **TecMFA**

Meet your Cyber Security Compliance requirement of enforcing MFA for desktop and server login

▸ **TecTANGO**

TecTANGO, offers efficient clinical workflows and enhances security across the EHR ecosystem. With a tap of a proximity badge or a swipe of a fingerprint,

▸ **TecUNIFY**

TecUNIFY is an all-in-one solution which addresses the thick client use-case for Okta users. TecUNIFY enables a seamless Single Sign-On experience for users, so that they don't have to remember every password.

▸ **TecUPS**

User Provisioning & Password Sync. for Okta mastered users on Non-Domain Joined Machines

▸ **TecZERO**

TecZERO is developed on top of Okta's Factor Sequencing framework that allows users to login to their Desktop without passwords.

▸ **TecSSPR**

TecSSPR is developed on top of Okta's MFA & Policy framework and extends the recovery factors available in Okta to provide other factors like Okta Verify, Yubikey etc. as MFA options.
