Credenti TecTANGO

Smart Card-Based Passwordless Login for Desktops

Overview: Credenti, with headquarters in Houston, Texas, and additional offices in Dubai and Hyderabad, was founded in 2004 and has since developed a strong global presence. The company employs over 400 seasoned professionals, each with an average of 20+ years in the techno-functional field, specializing in comprehensive Okta solutions.

Solution Description: Credenti TecTANGO is a Credential Provider for Windows 10 that facilitates passwordless login using various PIV compliant Smart Cards like HID Crescendo C2300 and Yubikey FIPS. This solution is designed for Okta customers, allowing them to log into Windows by simply possessing the smart card and knowing the PIN, with the option to enhance security further by integrating Okta Verify as an additional factor.

Key Features

- Supports passwordless desktop login, both online and offline.

- Provides a by-pass code generated by admins in case the smart card is forgotten.

- Enables Single Sign-On (SSO) into Okta post-desktop login.

- Installation is straightforward, and it allows for customizable UI branding.

Benefits

- Enhances security levels for both workstations and laptops.

- Eliminates the need for passwords, reducing user friction and enhancing productivity.

Additional Information

- Recognized as a Gold Certified Okta Partner.

- Offers 24x7 global support following a follow-the-sun support model.
